Summary

Senior engineer with nearly 4 years shipping production web platforms in React, Next.js, TypeScript and Node.js. I lead 3–5 engineers on SAP- and WMS-integrated logistics systems, built a config-driven platform that launches a fully branded client product from a JSON file in about 5 minutes, and launched my own SaaS, Teeme. I work AI-first: in three weeks of October 2026 I shipped 230+ fixes and features with about 90 production deploys, while owning every line I ship.

Experience

git log --career

Senior Software Engineer / Digitrell, Kochi, India — Jan 2026 – Present

Software Engineer, Apr 2025 – Dec 2025. Promoted after 9 months.

- Lead a team of 3–5 engineers on enterprise client projects; introduced the team's code review workflow and technical standards.
- Shipped 230+ fixes and features across 7 services (Node.js/TypeScript, Next.js, Azure SQL) in three weeks using AI-assisted development, with about 90 production deploys on Azure Container Apps.
- Kept production stable while releasing about 29 times a week, using hotfix branches, revision-based deploys and deploy-pipeline fixes.
- Integrated a second warehouse with a SCALE WMS: two-way sync of customers, carriers, buildings and appointments, with per-facility access.
- Architected a high-concurrency warehouse platform integrated with SAP S/4HANA, with real-time Socket.IO dashboards for live operations.
- Increased data-entry throughput by 40% by rewriting nested legacy queries and redesigning batch processing.
- Designed a transaction-safe ledger pipeline for automated cashflow posting with a complete audit trail, on Azure with API Management and CI/CD.

Frontend Developer / FPLE Technologies, Bengaluru, India — Jan 2024 – Mar 2025

- Improved Core Web Vitals and initial page load by 30% by moving key pages to server-side and static rendering in Nuxt.js.
- Built a reusable Vue.js component library with centralized Pinia state, speeding up delivery and keeping the UI consistent across products.

MERN Stack Developer / Scipy Technologies, Thiruvananthapuram, India — Jan 2023 – Jan 2024

- Migrated legacy multi-page workflows to React SPAs and built modular REST APIs in Node.js, TypeScript and MongoDB.

Projects

ship(projects)

Config-Driven ERP Platform — admin.ftrsteel.com / demo: steelops.teeme.org

React 19 / TypeScript / TanStack / JWT / RBAC

- One codebase ships as separate, fully branded products from a single JSON config (modules, roles, workflows, theming); a new client instance goes live in about 5 minutes with no code changes.
- Runs a steel fabrication company's production ERP: job orders, workforce management and inventory with role-based access.

Teeme / SaaS project management for software teams — teeme.org

Next.js / TypeScript / Node.js, Express on Bun / PostgreSQL + Prisma / Claude API

- Designed, built and launched solo: sprints, live Kanban boards, time tracking and analytics, on a multi-tenant Org/Team/Project permission model with Zod-validated, JWT-protected APIs.
- Shipped an AI assistant that turns plain-language or voice commands into board actions, asks for approval and only acts within the user's role.

Skills

Frontend	React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, TanStack, Pinia, Tailwind CSS, shadcn/ui
Backend & data	Node.js, Express, Bun, REST, Socket.IO, Zod, JWT, PostgreSQL, Azure SQL, MySQL, MongoDB, Prisma, TypeORM
Cloud & DevOps	Azure (Container Apps, API Management, DevOps CI/CD), Vercel, Git
Architecture & AI	Multi-tenant and config-driven systems, RBAC, real-time systems, SAP S/4HANA. AI-first development with Cursor and LLM agents, Claude API

Education

B.Tech, Computer Science / Vidya Academy of Science and Technology, Kerala — CGPA 8.6/10 / 2019 – 2023
